

R.M. Almonte, a self-published Metaphysical Sci-fi author, hails from New York City. Born to Dominican immigrants, he's imbued with a rich cultural heritage that deeply influences his writing. Almonte's journey took him from the bustling streets of NYC to Japan, and now to Florida, each locale enriching his narrative style. His first book, "Scratching the Cosmic Conscious," released in 2012, marked the start of his literary journey. He later embarked on the United Earth series, with titles like "Rough Beginnings" (2015), "Exiled" (2017), and "Despair & Hope" (2021), each book cementing his place in the Metaphysical Sci-fi genre.

Almonte's imagination was kindled by childhood experiences, notably stargazing with his father and being captivated by sci-fi TV shows such as Star Trek. These moments laid the groundwork for a vivid and expansive imagination. His writing process is uniquely inspired by his dreams, which often translate into the fantastical scenes in his novels. This deep connection to his inner world is evident in his storytelling, where personal experiences, dreams, and a rich cultural background merge to create immersive, thought-provoking narratives.
