

R.M. Almonte is more than just a self-published author of Metaphysical Sci-fi. He's a dreamer who was born and raised in the heart of NYC and is the son of Dominican immigrants. Now living in Japan, Ramon has taken his unique experiences and translated them into his fascinating United Earth series.

Ramon's first book, *Scratching the Cosmic Conscious*, was published in 2012, but it was only the beginning. He continued to develop his craft and in 2015, published the first part of his United Earth series - *Rough Beginnings*. *Exiled* followed in 2017 and in 2021, he published *Despair & Hope*, cementing his status as a rising star in the Metaphysical Sci-fi genre.

R.M. Almonte's imagination was sparked at an early age by his father, who would gaze at the stars with him and wonder about alien life. TV shows like *Star Trek* added fuel to his already vivid imagination, and it wasn't until 2006 that he began writing his first book. Doing extensive research on the UFO phenomenon was the jolt his imagination needed as an adult.

The influence of R.M. Almonte dreams cannot be overstated. They are often directly reflected in his novels, as he sees scenes from his book come alive in his mind. These are the few things that truly inspire him as a writer and his passion for the genre shines through in every page of his work.
